Data Analyst

Description:

About Digit88/The Opportunity

Digit88 is a boutique software product engineering company based out of Bangalore since 2014. Over the years, we have established and managed 12+ high performance product engineering teams in the areas of AI/Conversational AI/Tele-health/Healthcare systems/Logistics/E-commerce and more.

Since 2016, we have partnered with one of the world's foremost Conversational AI companies to set up their dedicated product engineering team in India. Over the past 5+ years we have been collaboratively engineering highly scalable, high performance, resilient platforms with teams in Seattle, Mountain View, UK, Israel and Germany.

Founded in New York City with over 1,200+ employees spanning 6 continents and dozens of countries, our partner is a transformational force in how brands and consumers communicate. With over 18,000 brands, including HSBC, Disney, Verizon, and Home Depot using the platforms that we are developing, our partner is a market leader in Conversational AI competing with the likes of Google Dialog Flow, IBM Watson, Microsoft and more.

You would be joining an existing team of 50+ professionals and help expand the Conversational AI professional services team that builds and delivers highly engaging and cutting edge chatbot/AI solutions that automate and power millions of conversations daily across the world.

Job Profile:

Digit88 is seeking a Data Analyst to join our Data Analytics team. As a Data Analyst, you will collaborate closely with product management, customer success and backend development teams, and will leverage your product and analytic expertise to build up and maintain the data pipeline of Conversational AI solutions to the next level.

Responsibilities:

- You will work in cross-functional Agile project teams alongside data engineers, data analyst, business analyst, project managers, and industry experts
- Support the data platform team by building up and maintaining the data pipeline
- Conduct effective requirements gathering to clearly identify customer problems
- Build and deliver compelling demonstrations of Conversational AI products
- Be a lifelong learner and develop your skills continuously
- Detail security posture and respond to security questionnaires
- Contribute to the success of a rapidly growing and evolving organization
