Full-Stack Principal Engineer

Digit88 Technologies Private Limited

Job Location
Bengaluru, India

Employment Type
Full-time

Experience
6+ years

Description:
Digit88 is a niche product engineering consulting company based out of Bangalore with experience of establishing and managing offshore development centers for US start-ups and MNCs over the last 6+ years. The founding team has 50+ years of product engineering and services experience out of India, China and the US.

The Opportunity:

Digit88 is establishing a new product development team for its US (East Coast) based partner, who is building a next-generation AI driven Video/Voice transcription SaaS platform. The candidate would be working independently and directly as a full stack developer with the founder to help create the MVP and expand the product over the months/years ahead.

Job Profile:

Digit88 is looking for an enthusiastic, self-motivated, hands-on Full-stack Principal Engineer to help us kickstart this new product engagement. Experience with a fast-paced India/US product start-up or a product engineering services company in a developer role, building a high-performance real-time system is mandatory. Applicants must have a passion for engineering with accuracy and efficiency, be highly motivated and organized, able to work independently taking right architectural decisions and also possess the ability to work as part of a team.

To be successful in this role, you should possess:

- Minimum 6 years working experience working as a Full stack Python backend and React/Angular/Vue frontend developer
- Expertise in Python, Flask, PostgreSQ
- Expertise in Elastic Search, Caching, Queuing
- Working knowledge in AWS or Heroku
- Expertise in web-app development with React/Vue/Angular/Redux, HTML/CSS, Javascrip
- Experience with system design/architectur
- Experience with SQL and NoSQL databases. GraphDB experience is a big plus
- Prior experience working with a product from scratch and understands the full life cycle in product development.

Additional requirements:

- Bachelor’s degree in Computer Science or a related field
- Should be able to work independently with India & US-based team members.
- Strong verbal and written communication with the ability to articulate problems and solutions over the phone and emails.
- Strong sense of urgency, with a passion for accuracy and timeliness.
- Ability to work calmly in high-pressure situations and manage multiple

projects/tasks.
- Ability to work independently and possess superior skills in issue resolution.
- Should have the passion to learn and implement, analyze and troubleshoot issues.

Benefits & working @ Digit88

- Comprehensive health and accident insurance
- Attractive pay package
- Bonus/Revenue share opportunities
- Creative, flexible and rewarding work environment
- Opportunity to work with a founding team of serial entrepreneurs with multiple successful exits to their credit. The learning will be immense just as will the challenges
