Junior Data Analyst

Description:

About Digit88/The Opportunity

Digit88 is a boutique software product engineering company based out of Bangalore since 2014. Over the years, we have established and managed 12+ high performance product engineering teams in the areas of AI/Conversational AI/Tele-health/Healthcare systems/Logistics/E-commerce and more.

Since 2016, we have partnered with one of the world's foremost Conversational AI companies to set up their dedicated product engineering team in India. Over the past 5+ years we have been collaboratively engineering highly scalable, high performance, resilient platforms with teams in Seattle, Mountain View, UK, Israel and Germany.

Founded in New York City with over 1,200+ employees spanning 6 continents and dozens of countries, our partner is a transformational force in how brands and consumers communicate. With over 18,000 brands, including HSBC, Disney, Verizon, and Home Depot using the platforms that we are developing, our partner is a market leader in Conversational AI competing with the likes of Google Dialog Flow, IBM Watson, Microsoft and more.

You would be joining an existing team of 50+ professionals and help expand the Conversational AI professional services team that builds and delivers highly engaging and cutting edge chatbot/AI solutions that automate and power millions of conversations daily across the world.

Job Profile:

Digit88 is seeking a Junior Data Analyst to join our Data Analytics team. As a Data Analyst, you would be able to turn project requirements into custom-formatted data reports. The ideal candidate for this position is able to do complete life cycle data generation and outline critical information.

Responsibilities:

- Work with stakeholders to identify opportunities for analysis insight to aid in decision making.
- Efficiently extract relevant data.
- Execute custom reporting and analysis to support account teams as needed.
- Collaborate with technical teams to provide insights and analysis based on data.
- Extract data from systems to create manual and/or automated easy-to-interpret reports as needed.
- Continuously improve methods, processes, and automation for bot optimization.

Requirements:

- Minimum 1-2 years of professional data operations experience
