6-10 Years

Description

About Digit88

Digit88 is a niche product engineering consulting company based out of Bangalore with experience of building offshore development centers for US startups and MNCs since 2014. The founding team has 50+ years of product engineering and services experience out of India, China and the US.

The Opportunity

Digit88 is establishing a new product development team for its US based partner, that is building next-generation Big Data, Cloud-Based Business Operation Support technology for utilities, retail energy suppliers and Community Choice Aggregators (CCA). The candidate would be joining an existing team of engineers in the US and help us expand the product engineering team and work on different products and on different layers of the infrastructure.

Job Profile:

Digit88 is looking for an enthusiastic, self-motivated, hands on senior web application engineer with superlative React/Redux and great troubleshooting skills to join our engineering team. Experience with a fast-paced India/US product start-up or a product engineering services company in a senior engineer role, building and managing a high-performance real-time system is mandatory. Applicants must have a passion for engineering with accuracy and efficiency, be highly motivated and organized, able to work as part of a team, and also possess the ability to work independently with minimal supervision.

In this role, you will:

● Architect and build Web Applications
● Maintain code quality and high standards of development
● Build out a new UI component library
● Understand our medical staff's workflow and participate in key design and UX ideation and improvements implementation
● Unit-test code for robustness, including edge cases, usability, and general reliability
● Manage releases for our internal stakeholders
● Build and maintain internal tooling and reporting infrastructure
● Work with product team to translate business requirements into smaller work units for the engineering team
● Collaborate with other engineers to plan, build and test new features

To be successful in this role, you should possess:

Digit88 Technologies Pvt Ltd

Digit88 Technologies Pvt. Ltd is a leading Offshore Software Development & Software Outsourcing Company located in India. Offering cost-effective, innovative Software Development, Software Solutions, and Consultancy Services to startups,

- BA/BS/Masters degree in CS or related with 6 years of experience as a web application engineer with fluency in Javascript and the MERN stack.
- At least 2 years of strong experience with Node.js
- Strong experience with websockets, observable based programming
- 4+ years experience with React, Redux, TypeScript
- Experience with Distributed systems and microservices
- Experience with databases such as MySQL
- Strong with HTML5/CSS3/SASS/LESS/Bootstrap/Material design
- Experience in creating client side asynchronous web applications using Ajax. Experience building a streaming analytics system is a big plus
- Expertise working with RESTful Architecture/Networking
- Experience with working with CI/CD infrastructure
