Senior Front End Engineer (Vue.js)

Digit88 Technologies Private Limited

Description About Digit88

Digit88 is a niche product engineering consulting company based out of Bangalore with experience of building offshore development centers for US startups and MNCs over the last 6+ years. The founding team has 50+ years of product engineering and services experience out of India, China and the US.

Job Location
Bengaluru, India

Employment Type
Full-time

Experience
4-7 Years

The Opportunity:

Digit88 manages and is expanding the dedicated offshore product development team for its US (Bay Area, NYC) based NLP/Chatbot platform development partner, that is building a next-generation AI/NLP/Chatbots based customer engagement platform. The candidate would be joining an existing team of 22+ engineers and help expand the team that develops and delivers cutting edge front end applications for our client that engage with consumers and manage conversations across the world.

Job Profile:

We are looking for an enthusiastic, self-motivated, hands-on front-end engineer with great troubleshooting skills to join our engineering team. Experience with a fast-paced India/US product start-up or a product engineering services company in a senior front-end engineer role, building and managing a high-performance real-time system is mandatory.

Applicants must have a passion for engineering with accuracy and efficiency, be highly motivated and organized, able to work as part of a team, and also possess the ability to work independently with minimal supervision.

In this role, you will:

- Study and learn the latest in AI/NLP/Chatbots domain and the messaging platform
- Work closely with the US, Europe and India engineering teams to help build the next generation front-end applications with full-fledged localization support
- Own the development of new modules and features
- Troubleshoot live production server issues
- Handle client coordination and be able to work as a part of a team or at times be able to contribute independently with minimal supervision
- Perform Unit Testing and Integration testing in a Continuous Deployment scenario
- Follow Agile methodology, JIRA for work planning, issue management/tracking

To be successful in this role, you should possess

- Bachelor's degree in Computer Science or a related field with a minimum 4 years experience working as a front-end engineer with fluency in JavaScript/Typescript
- At least 4 years hands-on practical experience with Vue.js
- Experience with the JavaScript language and its modern ES6+ syntax and features
- Highly proficient with Vue.js framework and its core principles such as components, reactivity, and the virtual DOM
- Hands-on with the Vue.js ecosystem, including Vue CLI and Vuex
- Good understanding of HTML5 and CSS3
- Ability to write efficient, secure, well-documented, and clean JavaScript code
- Familiarity with automated JavaScript testing, specifically testing frameworks such as Jest or Mocha
- Proficiency with modern development tools, like Babel, Webpack, and Git
- Experience with both consuming and designing RESTful APIs
- Knowledge in micro-services architecture and Docker usage
- Knowledge of functional programming and object-oriented programming paradigms
- Understanding of server-side rendering and its benefits and use cases
- Knowledge in AWS and Kubernetes (as a plus)

Additional Project/Soft Skills:

- Should be able to work independently with India & US based team members
- Strong verbal and written communication with ability to articulate problems and solutions over phone and emails
- Strong sense of urgency, with a passion for accuracy and timeliness
- Ability to work calmly in high pressure situations and manage multiple projects/tasks
- Ability to work independently and possess superior skills in issue resolution
- Should have the passion to learn and implement, analyse and troubleshoot issues

Benefits/Culture @ Digit88:

- Comprehensive Insurance (Health, Accident)
- Flexible Work Arrangements/Remote Work
- Profit Share Opportunities
- Accelerated learning & non-linear growth
- Flat organisation structure
- Global Peers – Working with some of the best engineers/professionals globally from the likes of Apple, Amazon, IBM and other innovating product companies
- Ability to make a global impact with your work, leading innovations in Conversational AI, Tele-Medicine, Healthcare and more

You will work with a founding team of serial entrepreneurs with multiple successful exits to their credit. The learning will be immense just as will the challenges.

This is the right time to join us and partner in our early growth!
