Senior Fullstack Engineer – MERN

Digit88 Technologies Private Limited

Description:

Digit88 is a niche product engineering consulting company based out of Bangalore with experience of building offshore development centers for US startups and MNCs over the last 6+ years. The founding team has 50+ years of product engineering and services experience out of India, China and the US.

Job Location

Bengaluru, India

The Opportunity:

Digit88 is setting up a dedicated offshore product development team for its US (New York) based partner, that is building innovative solutions in the space of Corporate Due Diligence. The candidate would be joining an existing team of 6+ engineers and help expand platform engineering, application development for our partner.

Employment Type

Full-time

Experience

5-8 years

Job Profile:

Digit88 is looking for an enthusiastic, self-motivated, hands-on MERN stack developer to kickstart the offshore engineering team for our partner. Experience with a fast-paced India/US product start-up or a product engineering services company in a developer role, building a high-performance real-time system is mandatory. Applicants must have a passion for engineering with accuracy and efficiency, be highly motivated and organized, able to work as part of a team, and also possess the ability to work independently with minimal supervision.

The candidate will need to have an extensive understanding of Javascript principles. We are a full-stack Javascript team. Daily, the candidate will be collaborating with onsite design and product teams, be a resource for other engineers on the team, and see feature requests and support/bug tickets from design into production. Our engineering team focuses heavily on teamwork and collaboration.

Your day to day responsibilities will include:

- Development of new modules and features for multiple products
- Troubleshoot live production server issues.
- Handle client coordination and be able to work as a part of a team or at times be able to contribute independently with minimal supervision.
- Perform Unit Testing and Integration testing in a Continuous Deployment scenario
- Follow Agile methodology, JIRA for work planning, issue management/tracking

Skills Requirements:

To be successful in this role, you should possess:

- Minimum 5 years working experience as a MERN stack developer in B2B SaaS domain.

- Fluent in Node.js & React.js and HTML/CSS including expertise in multiple CSS frameworks (SAAS/LESS)
- Strong expertise and passion for object oriented Javascript.
- Hands on with SQL, NoSQL and Graph databases
- Expert level with PostgreSQL, MongoDB and GraphQL
- Practical experience with Caching frameworks Memcached/Redis, Message Queues
- Familiarity and experience with CI/CD, Container architecture – Docker/Jenkins and build scripts
- Should have built high performance, high availability REST APIs and web applications.

Necessary Qualifications/Skills

- Bachelor's degree in Computer Science or a related field
- Minimum of 5 years in full stack Javascript/Node.js/React development
- Strong articulation/communication skills conveying technical designs and decisions to the rest of the team.
- Ability to work independently and possess superior skills in issue resolution.

Additional Project/Soft Skills:

- Apollo GraphQL
- SQL
- TDD & Integration Testing
- Strong verbal and written communication with ability to articulate problems and solutions over phone and emails.
- Strong sense of urgency, with a passion for accuracy and timeliness.
- Ability to work calmly in high pressure situations and manage multiple projects/tasks.
- Should have the passion to learn and implement, analyse and troubleshoot issues
