Senior Engineer- Java Platform Engineering (SDE2)

Description

About Digit88

Digit88 is a niche product engineering consulting company based out of Bangalore with experience of building offshore development centers for US startups and MNCs since 2014. The founding team has 50+ years of product engineering and services experience out of India, China and the US.

The Opportunity

Digit88 manages and is expanding the dedicated offshore product development team for its US (Bay Area, NYC) based NLP/Chatbot platform development partner, that is building a next-generation AI/NLP/Chatbots based customer engagement platform. The candidate would be joining an existing team of 45+ engineers and help expand the Platform Engineering and Production Support services for our client, assume technical leadership of the highly scalable and available messaging platform that connects the conversational AI platform to human agents.

Job Profile

Digit88 is looking for an enthusiastic, self-motivated, hands-on Java/J2EE platform engineer to join the back-end platform engineering team for our partner. Experience with a fast-paced India/US product start-up or a product engineering services company in a developer role, building a high-performance real-time system is mandatory. Applicants having experience in developing and maintaining large scale messaging platforms are preferred. Applicants must have a passion for engineering with accuracy and efficiency, be highly motivated and organized, able to work as part of a team, and also possess the ability to work independently with minimal supervision.

To be successful in this role, you should possess

● Bachelor's degree in Computer Science or a related field with 6-10 years hands-on experience with Java based open source tech stack
● Expertise in Core Java, Data Structures, J2EE with proven expertise in Spring MVC, Spring boot, Microservices architecture, Web Services (Rest) in distributed systems
● Practical experience with MySQL and/or NoSQL databases like Couchbase, DynamoDB, Cassandra
● Practical experience with Caching frameworks Memcached/Redis, Message Queues (JMS, RabbitMQ)
● Experience in building high performance, high availability REST APIs and REST clients
● Expertise with log file analysis using one or more of ELK, Splunk, Kibana
● Prior experience with CI/CD, Container architecture – Docker/Jenkins and build scripts Maven/Ant
● Experience with Kubernetes

Hiring organization
